- ida-victoria

- m

- ok

Feedback for All

- Provide a README.md file in the folder of your project.

- Provide me the installs in "# pip install XYZ # Remove # to install the package to run the project".

- Put all imports and installs in the first "box". Do not use emojis – at least not without writing that you have used ChatGPT.

- Remember to comment on the outputs as if it was a macro assignment.

- Overall, your projects are quite good. I will provide feedback by mail on Sunday.
